

Disclosure statement by Brad Larsen for “Discounts and Deadlines in Consumer Search”

- The dataset used in this paper is owned by eBay and is proprietary.
- The research in this paper was conducted through a data-sharing agreement between Larsen and Platt and eBay Research Labs. I was an paid postdoc at eBay Research Labs, and later a part-time paid consultant, during the beginning stages of this research. I am no longer affiliated with eBay other than through access to this and other specific datasets I have permission to use.
- The data-sharing agreement allows me continued access to the data used in this project.
- eBay had the right to review the manuscript prior to public circulation to ensure that no sensitive corporate information was unintentionally disclosed. eBay did not attempt to influence the outcome of the project.
- We did not seek IRB approval for this project because the data we used is de-identified, and the data was not collected for the purpose of this project, but rather as part of eBay’s day-to-day business activities.
