

Disclosure statement, AER submission, February 2022

Manuscript:

Productivity Shocks, Long-Term Contracts and Earnings Dynamics

Regarding disclosure:

I declare that I have no relevant or material financial interests that relate to the research described in this paper. This research received financial support from NSF Grant SES-1658920.

Regarding data availability policy:

The project makes use of Swedish confidential de-identified micro-data to which access is restricted. However, we provide in the paper all the moments necessary to perform the structural estimation of the model. Computing these moments requires access to the micro-data.

Researchers can gain access to the data by submitting a written application to the IFAU (<http://www.ifau.se/en/>) or to Statistic Sweden. Applications for the data should include a detailed research proposal describing the goals and methods of the project, a detailed list of variables, the selection criteria to be used, and how the research will be funded. Once received, applications must be certified by the IFAU in order to ensure that data are processed in a manner that protects the personal integrity of individuals surveyed. The data is always hosted at the IFAU and researchers are given remote access usable from within the European Union. Inquiries about access should be addressed to: IFAU, Kyrkogårdsgatan 6, Box 513, 751 20 Uppsala, Sweden.

Regarding IRB approval:

No human subjects were involved.

Sincerely,

Thibaut Lamadon

A handwritten signature in black ink, appearing to read 'Thibaut Lamadon', written in a cursive style.
