

SUPPLEMENTAL APPENDIX

The Impact of Cash after Childbirth on Crime: Evidence from a Discontinuity in Tax Benefits

Sakshi Bhardwaj

Table A1—: Mother Cumulative: Criminal Justice Outcomes within t relative to the year of Childbirth

	(1) t=-1	(2) t=-2	(3) t=-3	(4) t=-4	(5) t=-5	(6) t=1	(7) t=2	(8) t=3	(9) t=4	(10) t=5	(11) t=6	(12) t=7	(13) t=8	(14) t=9	(15) t=10
Mother															
Panel A: Any Criminal Charge for Mother															
Any Criminal Case	-0.000866 (0.00296)	0.000661 (0.00423)	0.00182 (0.00478)	-0.00135 (0.00557)	-0.00164 (0.00631)	-0.00138 (0.00231)	-0.00369 (0.00372)	-0.00699 (0.00520)	-0.00589 (0.00667)	-0.0132 (0.00841)	-0.0160* (0.00870)	-0.0210** (0.00954)	-0.0170 (0.0116)	-0.0309** (0.0130)	-0.0324** (0.0145)
Mean	0.009	0.019	0.027	0.033	0.037	0.010	0.020	0.031	0.041	0.050	0.058	0.067	0.077	0.091	0.097
Observations	34,312	32,367	30,484	28,619	26,669	36,184	33,449	30,688	27,924	25,133	22,199	19,241	15,909	12,728	10,815
Panel B: Number of Criminal Charges for Mother															
Number of Cases (Poisson)	-0.360 (0.426)	-0.389 (0.291)	-0.286 (0.243)	-0.223 (0.241)	-0.149 (0.251)	-0.104 (0.305)	-0.116 (0.238)	-0.0125 (0.245)	0.00318 (0.238)	-0.0973 (0.239)	-0.0828 (0.235)	-0.229 (0.245)	-0.199 (0.253)	-0.523** (0.252)	-0.486* (0.248)
Mean Outcome	0.018	0.039	0.060	0.077	0.090	0.022	0.048	0.080	0.115	0.153	0.188	0.229	0.284	0.347	0.388
Observations	34,312	32,367	30,484	28,619	26,669	36,184	33,449	30,688	27,924	25,133	22,199	19,241	15,909	12,728	10,815

Note: This table presents point estimates and standard errors of β_0 from estimating Equation (1) on the criminal justice outcomes of mothers, defined in years relative to childbirth at t=0. Columns (1)–(5) report results for cumulative years -1 to -5 before childbirth, and Columns (6)–(15) report results for cumulative years 1 to 10 after childbirth.
