**Centre for Research in  
Economics of Education**  
Prof. Dr. Stefan C. Wolter

Berne, 10. January 2017

**Disclosure statement – Stefan C. Wolter**

**“Gender, competitiveness and study choices in high school - evidence from Switzerland”**

- 1) I received financial support through a research grant of the Swiss State Secretariat for Education, Research and Innovation, which was partly used to fund this project.
- 2) I received a personal grant from the Jacobs Foundation to write a literature review on the choice of occupations of adolescents.
- 3) I received a personal grant from the Bertelsmann Foundation with no connections to this article.
- 4) My affiliations include the following positions: Managing director of the Swiss Coordination Centre for Research in Education as well as research fellow of CESifo and IZA.
- 5) IRB approval was not obtained because the data collection was done under the auspices of the Faculty of Business, Economics and Social Sciences of the University of Bern, which had no Institutional Review Board. However, the cantonal Ministry of Education, through which the addresses of the schools were obtained, checked the research proposal and approved it.
- 6) I declare, that I have no relevant or material financial interests that relate to the research described in this paper.

Yours sincerely,
